Title

CONFIGURING METHOD AND DEVICE

Technology Center 2600

Assistant Commissioner for Patents Washington, DC 20231

REQUEST TO CORRECT FILING RECEIPT

Applicant requests that the number of drawings in the application be corrected from "zero drawing" to "12 drawings".

Enclosed is a copy of the filing receipt as received from the PTO. The number of drawings is in error. The correct number should be "12 drawings", as shown in the enclosed copies of:

- 1) a copy of the returned postcard which shows the correct number of drawings in the application; and
- 2) a copy of the PCT International Preliminary Examination Report which indicates that PCT/IB99/00274 (the application this application is based on) contained 12 drawing sheets.

Because this is a PTO error, no petition is believed necessary. However, if a petition is deemed to be required, please considered this paper as such and charge the appropriate fees to the Deposit Account 50-0591, reference No. 11345/024001.

PATENT ATTORNEY DOCKET NO. 11345/024001 U.S. PATENT APPLICATION NO. 09/601,591

If there are any other charges, or any credits, please apply them to the same Deposit

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the PTO processes the reply to the Notice, the PTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

LICENSE FOR FOREIGN FILING UNDER Title 35, United States Code, Section 184 Title 37, Code of Federal Regulations, 5.11 & 5.15

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CRF 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 36 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

PLEASE NOTE the following information about the Filing Receipt:

- The articles such as "a," "an" and "the" are not included as the first words in the title of an application. They are considered to be unnecessary to the understanding of the title.
- The words "new," "improved," "improvements in" or "relating to" are not included as first words in the title of an application because a patent application, by nature, is a new idea or improvement.
- The title may be truncated if it consists of more than 600 characters (letters and spaces combined).
- The docket number allows a maximum of 25 characters.
- If your application was submitted under 37 CFR 1.10, your filing date should be the "date in" found on the Express Mail label. If there is a discrepancy, you should submit a request for a corrected Filing Receipt along with a copy of the Express Mail label showing the "date in."
- The title is recorded in sentence case.

Any corrections that may need to be done to your Filing Receipt should be directed to:

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

see separate sheet

INTERNATIONAL PRELIMINARY INTERNATION REPORT - SEPARATE SHEET

International application No.

PCT/IB99/00274

 The following document is cited in the International Search Report is referred to in this report:

D1 = EP-A-0 562 295

Article 6, PCT

- 2. The term "device for use in..." in claims 1 and 28 is unclear since it leaves open if the receiver/decoder in which the device is to be used is part of the claimed apparatus or not.
- 3. Claim 12 which refers to any previous claim is unclear since it claims a plurality of client applications and e.g. when referring directly back to claim 1 it is open what these client applications are or do.
- 4. Claims 41 and 42 are unclear since the claims as such do not define the scope of protection sought. (see also Rule 6.2 PCT)

Article 33(2) PCT

5. Document D1 (see whole document) discloses a system for controlling several smart cards. The system either tries one after the other all smart cards to find the correct one to descramble an encoded program or the device stores some basic data of all smart cards such that for a given encrypted channel the device can switch immediately to the correct smart card. In this system, only one smartcard (the one in use) is powered up and operational.

The set up is such that the processor in the decoder ("manipulation means") carries out the decoding process according to a predefined general algorithm (can be regarded as "manipulation protocol") and gets the parameters for adapting the decoding process to the incoming data form the smart card. This transfer of parameters can be regarded as "configuration of a manipulation protocol".

Since in one mode the processor knows which card reader to use for a desired television program an identifier for the required card is generated and only the

INTERNATIONAL PRELIMINARY International application No. EXAMINATION REPORT - SEPARATE SHEET

parameters of the selected card are loaded into the descrambler and are used by the manipulation algorithm of the decoder. This functionality is regarded as falling under the scope of "receiving a command instructing configuration of the manipulation protocol in dependence on to conditional access system":

In this mode of operation of D1 the features claimed in the dependent claims are implicitly disclosed in D1.

Thus, the subject matter of claims 1-40, as far as they can at present be understood, is known from D1 and these claims do not meet the requirements of Article 33(2) PCT.

Miscellaneous

6. The application does not meet the requirements of Rule 5.1 PCT, since the prior art as represented by document D1 is not disclosed therein.
